In addition to over 10 years of experience in the public sector, Ms. Woltmann has a Master's degree in Public Policy from the Heller School at Brandeis University and a Bachelor's degree in English from Hartwick College.

Alan Sager, Ph.D.
Boston University
School of Public Health

Alan Sager is a professor of health law, policy, and management at the Boston University School of Public Health, where he has taught since 1983. His courses on health finance, policy, planning, and management have won twelve awards. He directs the School's certificate program in health policy and law.

In 1979, he designed a "time banking" method of mobilizing voluntary aid for disabled citizens by creating a parallel economy of good deeds. Volunteers could contribute time by helping others and then withdraw it when they needed support.

His ongoing analyses of hospital closings in 52 U.S. cities over 75 years have shown that neighborhood race and hospital size predict survival but efficiency does not. Closings undermine access while boosting cost.

He suggests that U.S. prescription drug prices can and should be cut, to make needed meds affordable for all Americans—and that this can be done while spurring drug makers to innovate.

Alan Sager holds an undergrad degree in economics from Brandeis and a doctorate in city planning from MIT.
